

Canvas integration

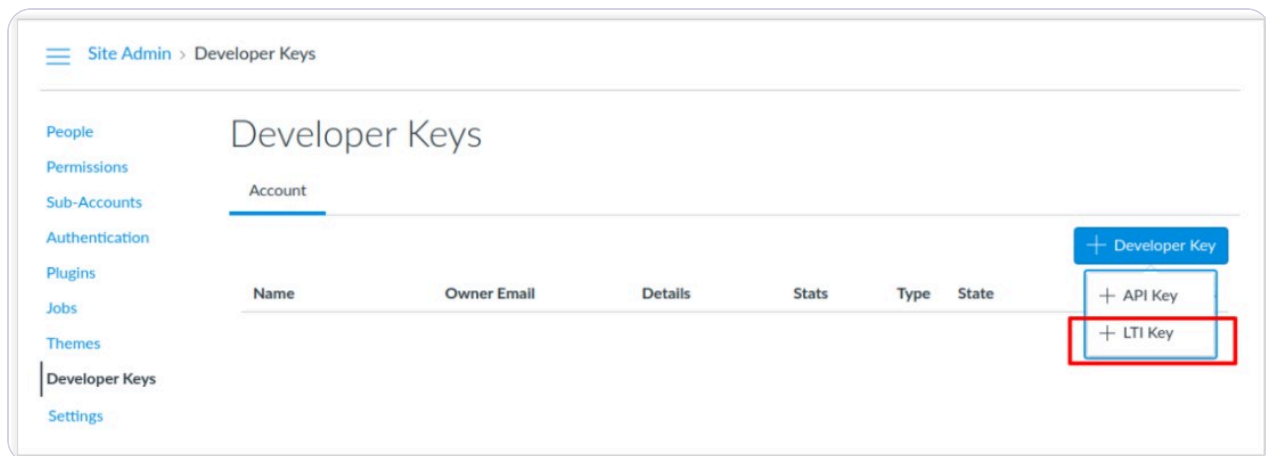

Your Canvas admin sets it up once. Then teachers bring their Canvas classes straight into Mission.io.

BEFORE YOU START

You'll need Canvas administrator access. Teachers can't install this themselves.

1 Add a developer key

Log in to your Canvas account with administrator privileges. Navigate to the Admin section. Within the Admin section, find "Site Admin". Click on "Developer Keys". Click the button "+ Developer Key". From the dropdown menu, choose "+ LTI Key".

2 Choose Enter URL

A menu will appear with several required fields. Choose Methods, choose "Enter URL".

3

Fill in the key

Enter the following information into the required fields.

Key Name

Mission.io

Owner Email

engineering@mission.io

JSON URL

`https://login-server.mission.io/lms/lti/config/canvas`

Redirect URIs

This section will be populated automatically.

Notes (optional)

Any notes you may want to enter here.

Key settings

Key name: Mission.io	Configure
Owner email: engineering@mission.io	Method Enter URL
* Redirect URIs: 	JSON URL https://login-server.mission.io/lms/lti/config/canvas
Notes: 	
☐ Test cluster only	

4

Set it to ON

Make sure the state of the tool is set to ON.

5

Copy the Client ID

Copy the Client ID value in the Details column of your new key for the next steps.

Developer Keys

Account

+ Developer Key

Name	Owner Email	Details	Stats	Type	State	Actions
Mission.io	engineering@mission.io	187130000000000110 Show Key	Access Token Count: 0 Created: Nov 9 at 2:22pm Last Used: Never		ON OFF	Edit Delete

6

Add the app

Navigate to Settings > Apps > View App Configurations > “+ App”.

- Choose Configuration Type, By Client ID.
- Enter the Client ID of the Developer Key (from the previous step).
- Click Submit, then Install.

7 Last step: send us two things.

Email your Client ID and your Canvas URL (like yourschool.instructure.com) to support@mission.io. We'll finish the connection on our side and let you know when it's live.
