

Schoology integration

Install the Mission.io app from the Schoology App Center. It takes a few clicks and works across your whole organization.

BEFORE YOU START

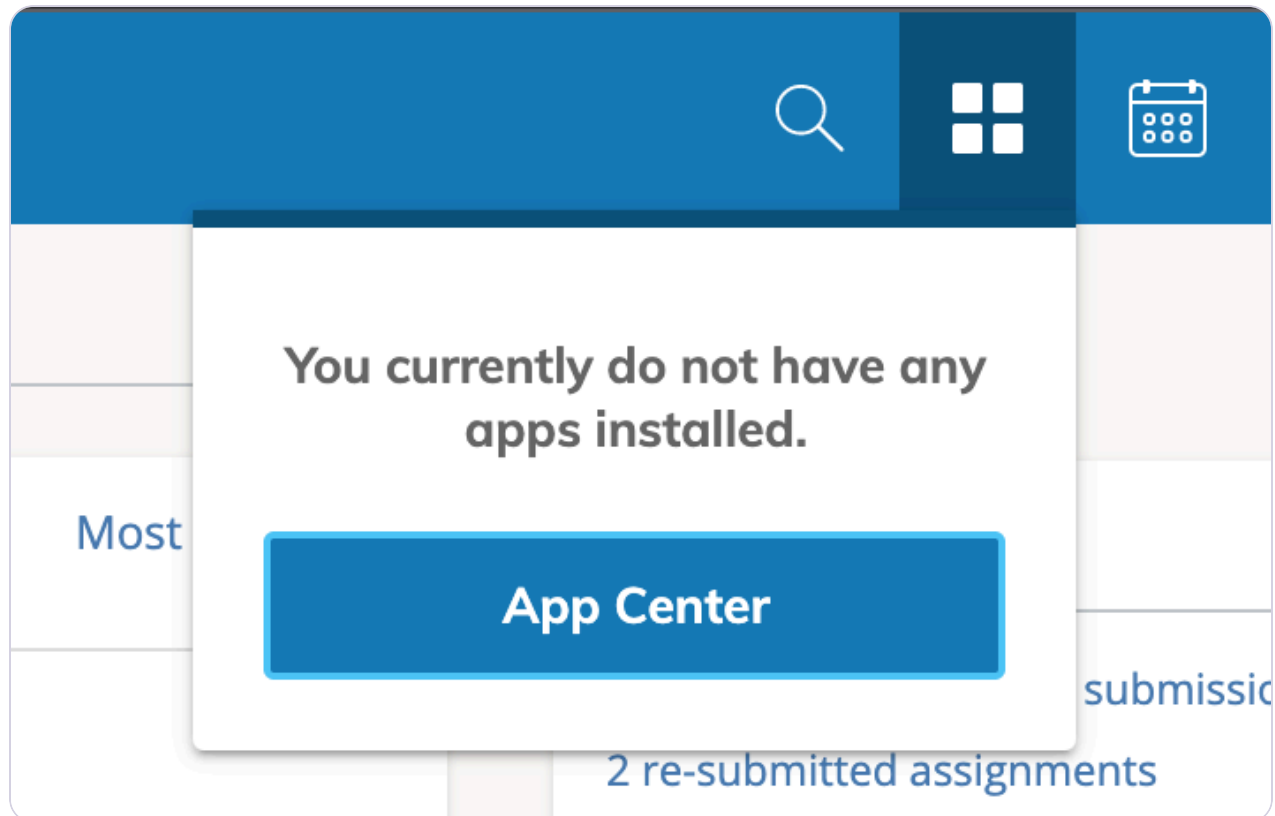

You'll need Schoology admin access to add an app to your organization.

1

Find the app

Log in to your Schoology account and locate the App Center icon at the top of the menu bar. Search for the Mission.io app, then select it. If you cannot find the App Center from your Schoology account, then click on the following link, which will take you straight to it.

[OPEN THE SCHOLOGY APP CENTER →](#)

2 Install the LTI 1.3 app

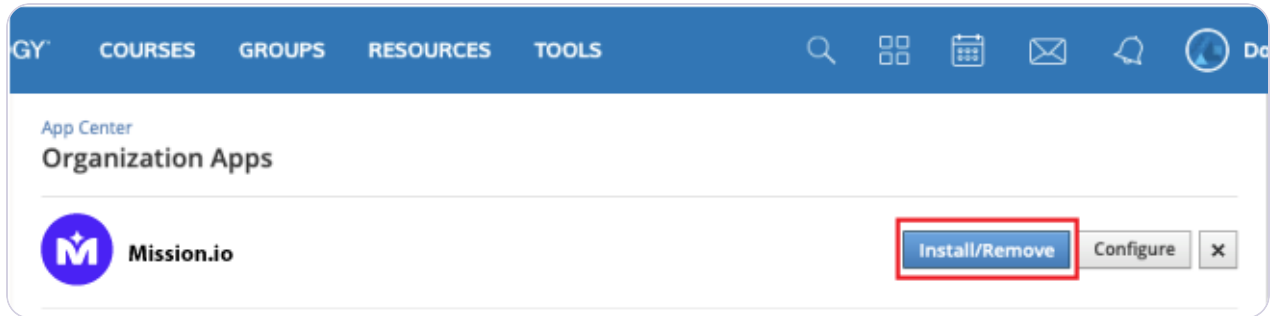

Click "Install LTI 1.3 App", click "I Agree", then Continue.

3 Add to your organization

Select the "Add to Organization" option in the pop-up window that appears.

4 Select Install/Remove

Once you have added the Mission.io app to your organization, continue the process by selecting Install/Remove.

5

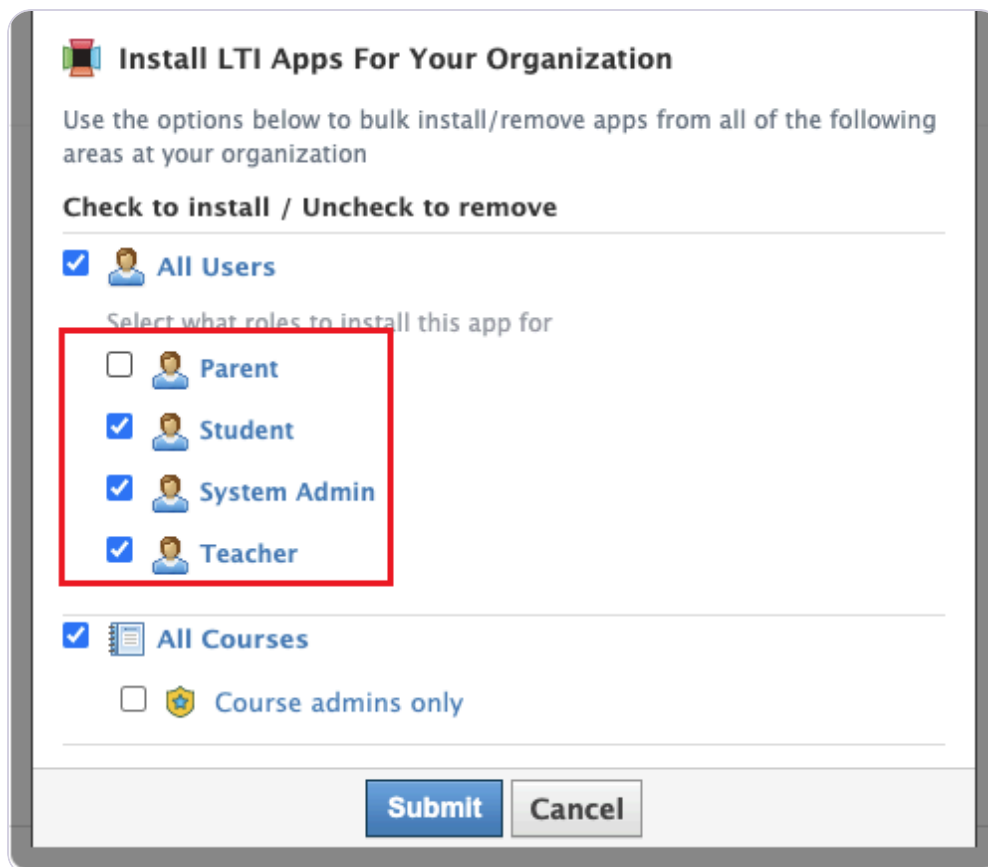

Choose where

Select where you would like to install the Mission.io app.

6

Pick users and courses

Make sure to select all users (except parents) and all courses, then click Submit.

7 Find it in your courses

After successful installation, go to your Courses, and locate the Mission.io app at the left side of the course navigation.

Mission.io now shows in each course's left-hand navigation.
